

PBS Compostable Cartons

Introducing new Detpak compostable PBS Cartons, an innovative range of packaging, made using Polybutylene Succinate (PBS). This material creates a compostable and recyclable* solution for cartons, without compromising on quality or performance.

Ideal for fast food restaurants, cafes and food trucks, the PBS Compostable Range is custom printable and certified to EN 13432.

PBS Compostable Cartons

What is PBS?

Polybutylene Succinate is a polymer made from two different components. One component is fossil fuel based, and the other is derived from renewable plant sources. PBS lined packaging is an outstanding packaging choice as it is both kerbside recyclable and industrially compostable, whilst providing the advantages of a protective lining for greasy, saucy foods.

Features & Benefits:

- Lined with innovative PBS to provide a compostable food packaging solution
- Accepted nationwide including South Australia and Western Australia, under Single-Use Problematic Plastic Legislation in Australia*
- Windows made from polylactic acid (PLA) in Window Lunch Boxes and cellulose film in Hot Food Boxes. PLA is derived from cornstarch whilst cellulose film is from plant cells and performs well in high-temperature environments. Both films are compostable and provide crystal clear viewing.

 Recyclable*

 Compostable
EN 13432 Certified

 No Added PFAS

 Nationwide SUPPs
Approved
